

Leadership Sinai Centre for Diabetes
**GDM Virtual Learning
Participant Information**

The LSCD Gestational Diabetes Program supports referred patients of Dr. Denice Feig and Dr. Diane Donat with their blood sugar management in pregnancy.

What is Gestational Diabetes?

A diagnosis of Gestational Diabetes Mellitus (GDM) means that your blood sugars are high during your pregnancy. It is perfectly normal to feel scared, upset, stressed, or overwhelmed by this diagnosis.

The good news – you can have a healthy pregnancy with GDM! The LSCD GDM team is here to support you along the way.

The GDM Program

The GDM Introductory Class is hosted by a Certified Diabetes Educator (CDE) Dietitian and/or Nurse on Thursday mornings from 9:00 – 11:00 am via Zoom. CDE Nurses and Dietitians have specific training in how to support patients living with diabetes and work with complex diabetes cases including Gestational Diabetes.

Why am I attending this session?

You have been diagnosed with GDM by your obstetrician (OB) doctor.

The session explains what GDM is, why it matters, and how to manage GDM for a healthy pregnancy, delivery, and beyond. The Nurse and/or Dietitian running the session are part of your GDM care team for your pregnancy along with your Endocrinologist.

It is important to understand gestational diabetes and how to manage the diagnosis in order to make the most of your appointments with the team and have the best pregnancy outcomes.

Your Privacy and Participation in the Zoom Session

Our goal is to create a safe, comfortable, and private learning space for all our participants.

Please see Page 2 for full information on your privacy in the zoom session. Please see Page 3 for your participation agreement, effective upon entry to the session.

Leadership Sinai Centre for Diabetes
GDM Virtual Learning
Zoom Privacy Information

Thank you for joining us in a virtual session to learn how to manage GDM during your pregnancy! In order to ensure a safe and positive learning experience for our participants we have established ground rules for participation and have provided information on how to ensure your privacy during the session.

Your Privacy in the Zoom Session:

1. Display name: Your display name will be visible to all participants. Please ensure your display name is your first name only (last initial may also be included) to ensure your privacy.

Participants are not able to change their display name upon entry if it does not meet the criteria above. The session host will double check to ensure no full names, phone numbers, or other personal identifiers are visible in display names. The host will change display names to meet the criteria above, if required.

2. Camera: Participants may decide to keep their cameras on or off based on their comfort level throughout the session.

3. Microphone: For ease of communication, access to a microphone will support your ability to participate fully in the session. If you are unable to access a microphone, please ensure you are able to access the chat feature on zoom in order to communicate with the health care provider when needed.

4. Chat: Participants may use the chat feature to ask questions and communicate with the group and health care provider. Users are automatically set to send chats to “Everyone” – all current participants.

If you would like to send a chat directly to the host or health care provider(s) in the session, use the ‘To:’ drop down menu to select the name of the health care provider. In this way, participants may ask questions anonymously to be answered in the group space without identification of the asker.

5. Personal Questions: Participants may use the direct message “Chat” feature described above to send questions to the health care provider in the session. If participants have questions more suited to individual health care appointments, they may contact the health care provider after the session and/or ask the question(s) during the individual follow-up visit in following week.

6. Recording: The zoom session will not be recorded by any participant, the health care provider, or session host.

Participant Agreement

By joining the session, I agree to:

1. Find a setting that will be supportive of my learning needs when attending the session:
 - a) E.g. you may need a place where you can be alone or with a support person.
 - b) Avoid multitasking (e.g. actively working, driving a car, walking, cooking etc.) while attending the session.
2. Not record the zoom session in any way (audio, video, etc.) and I will not repeat personal information or identifiers if shared by participants outside of the learning space.
3. Confirm my understanding of the content with the health care provider, if needed, throughout the session.
 - a) Confirmation can be, but is not limited to: (1) participating in the chat box, (2) providing visual cues (ex. nodding) if my camera is on, (3) providing verbal cues (ex. saying “I understand”) if my microphone is unmuted, etc.
